Delivery Contents:

Emergency power generator as emergency power system Type: WA IG 500 "S" Super soundproofed for outdoor installation with approx. 70 db"A" measured at 7 meters as the mean value for an all-round measurement at 7 meters at 7 measuring points.

Day tank integrated in the sound insulation capsule, capacity 950 litres

Fuel consumption, according to IVECO data sheet:

At 100% load = 100.6 liters / tank capacity sufficient for 9.4 hours At 50% load = 51.5 liters / tank capacity sufficient for 18.4 hours

Further equipment:

Oil drip tray in the base frame for collecting all liquids Built-in 230 volt cooling water pre-heater and 24 volt battery charger.

Optional: Automatic start with mains & generator switching 4-pole $\,$

External emergency power switchgear for installation in the building, with mains monitoring and 4-pole mains generator switchover

Function: In the event of a power failure, the start command is sent to the diesel unit. When the nominal speed and nominal voltage are reached, the generator switch is switched on. When the mains returns, the automatic system monitors the mains voltage. When this is stable again, the system switches back to mains operation. The diesel unit is stopped after the cooling time and waits in automatic mode for the next power failure.
